

## BED BUG TREATMENT PREPARATION FORM

**PLEASE SIGN AND RETURN THIS FORM TO THE OFFICE ONCE ALL PREPARATION IS COMPLETE**

The following steps are required and will assist in the elimination of your bed bug population. Please make required preparations the day prior to your scheduled service day. All steps must be completed for treatment to be performed.

**Please prepare ALL rooms. Your entire apartment must be treated. DO NOT APPLY ANY STORE-BOUGHT PRODUCTS.**

1. \_\_\_ Remove linens from beds and wash and dry them using the hottest temperature available and place in sealed bags after drying.
2. \_\_\_ Remove draperies and wash and dry them using the hottest temperature available and place in sealed bags after drying.
3. \_\_\_ Empty dresser drawers and nightstands in ALL bedrooms. Wash & dry or dry clean all clothing and fabrics, using the hottest temperature available, and place in sealed bags after drying.
4. \_\_\_ Remove items from flooring, especially where the carpet meets the baseboards, **including closets.**
5. \_\_\_ Remove mesh covering from under furniture and dismantle bed frames. Discarding infested mattresses, box springs and/or any other personal items is **NOT** required for treatment. ENVIROSMART MULTIFAMILY PEST SOLUTIONS IS NOT RESPONSIBLE FOR DISCARDED PERSONAL BELONGINGS OR FURNISHINGS.
6. \_\_\_ Cover or remove items on kitchen and bathroom countertops. Food preparation surfaces should be cleaned after service is completed.
7. \_\_\_ Vacuum floors thoroughly, especially where the carpet meets the baseboards. Vacuum upholstered furniture, paying attention to seams and skirting. Place vacuum bag in an exterior trash receptacle.
8. \_\_\_ PULL ALL FURNITURE 2 FEET AWAY FROM WALLS. Remove carpet from tack strip behind beds.
9. \_\_\_ Fish tanks and aquariums must be shut off and covered with plastic prior to treatment. EnviroSMART cannot guarantee arrival times or how long the aquarium filtration will be off.
10. \_\_\_ People and pets must vacate unit during and for **4** hours after treatment.

### FAQ:

Q: What will the technician do to treat for bed bugs in your home?

A: A fine mist insecticide/growth regulator will be applied to all baseboards, corners, ceiling joints, around windows, outlets, bed frames, box spring and mattress and all carpeted areas in accordance with the label.

Q: Will all bed bugs die immediately after treatment?

A: No. Most adult bed bugs will be killed; however, you should expect to see some bed bugs for as much as 3-4 weeks after treatment. These bed bugs are typically newly hatched and will be killed by the residual effects of the treatment.

Q: Is a follow up treatment or inspection necessary?

A: No. If you are seeing live bed bugs after 30 days, please notify the office and a follow up treatment will be scheduled. Targeted vacuuming with crevice tools along baseboards, mattresses, box springs and any areas where activity is seen will help to break the lifecycle.

**I have read, understand, and will follow the required preparations for bedbug treatment.**
